Product Data Sheet

PE/Dazzle™ 594 anti-human CD38

Catalog # / Size: 2383150 / 100 tests

2383145 / 25 tests

Clone: HB-7

Isotype: Mouse IgG1, κ

Immunogen: BJAB human B cell line.

Reactivity: Human

Preparation: The antibody was purified by affinity

chromatography and conjugated with PE/Dazzle™ 594 under optimal conditions. The solution is free of unconjugated PE/Dazzle™ 594 and

unconjugated antibody.

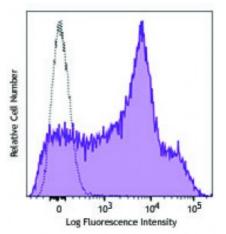

Formulation: Phosphate-buffered solution, pH 7.2,

containing 0.09% sodium azide and

0.2% (w/v) BSA (origin USA).

Workshop Number: III 155

Concentration: Lot-specific

Human peripheral blood lymphocytes were stained with CD38 (clone HB-7) PE/Dazzle™ 594 (filled histogram) or mouse IgG1, κ PE/Dazzle™ 594 isotype control (open histogram).

Applications: Flow Cytometry

Recommended

Applications:

Usage:

Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is 5 microL per million cells or 5 microL per 100 microL of whole blood. It is recommended that the reagent be titrated for optimal performance for each application.

* PE/Dazzle™ 594 has a maximum excitation of 566 nm and a maximum emission

of 610 nm.

Application Notes:

Additional reported applications for the relevant formats include: indirect

immunofluorescent staining1 and Western blotting2.

Description: CD38 is a 45 kD type II transmembrane glycoprotein also known as T10. It is an

ADP-ribosyl hydrolase expressed at variable levels on hematopoietic cells and in some non-hematopoietic tissues (such as brain, muscle, and kidney). In humans, it is expressed at high levels on plasma cells and activated T and B cells, natural killer (NK) lymphocytes, myeloblasts, and erythroblasts. By functioning as both a cyclase and a hydrolase, CD38 mediates lymphocyte activation, adhesion, and

the metabolism of cADPR and NAADP. CD31 is the ligand of CD38.
