Product Data Sheet

Purified anti-human B7-H4

| Catalog # / Size: | 2390505 / 25 μg 2390510 / 100 μg |
|-----------------------|---|
| Clone: | MIH43 |
| Isotype: | Mouse IgG1, к |
| Reactivity: | Human |
| Preparation: | The antibody was purified by affinity chromatography. |
| Formulation: | Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide. |
| Concentration: | 0.5 |

Human B7-H4 transfected P815 cells were stained with purified B7-H4 (clone MIH43, filled histogram) or purified mouse IgG1, κ isotype control (open histogram), followed by anti-mouse IgG PE.

Applications:

| Applications: | Flow Cytometry, Immunohistochemistry |
|----------------------------|---|
| Recommended Usage: | Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is ≤ 0.5 microg per million cells in 100 microL volume. It is recommended that the reagent be titrated for optimal performance for each application. |
| Application Notes: | Additional reported applications (for the relevant formats) includes immunofluorescence2. |

| Description: | B7-H4, also known as VTCN1, is a type I transmembrane protein and member of the B7 family. Its extracellular region consists of one IgV-like and one IgC-like domain. B7-H4 expression has been reported on activated T cells, B cells, monocytes, and dendritic cells. On T cells, B7-H4 inhibits proliferation, cytokine secretion, and cytotoxicity. B7-H4 is also expressed by different carcinomas including renal, gastric, breast, ovarian and melanoma. Its expression is associated with a poor prognosis. |
