## **Product Data Sheet**

## PE anti-human CD195 (CCR5)

Catalog # / Size:	2395525 / 25 tests 2395530 / 100 tests	
Clone:	J418F1	
Isotype:	Rat IgG2b, к	nber
Immunogen:	Human CCR5 transfectants	elative Cell Nur
<b>Reactivity:</b>	Human	
Preparation:	The antibody was purified by affinity chromatography and conjugated with PE under optimal conditions. The solution is free of unconjugated PE and unconjugated antibody.	Relat
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v) BSA (origin USA).	Hui Iym
<b>Concentration:</b>	Lot-specific	CD hist

Human peripheral blood lymphocytes were stained with CD195 (clone J418F1) PE (filled histogram) or rat IgG2b, κ PE isotype control (open histogram).

## **Applications:**

**Applications:** Flow Cytometry

**Recommended** Usage: Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is 5 microL per million cells or 5 microL per 100 microL of whole blood. It is recommended that the reagent be titrated for optimal performance for each application.

**Description:** CD195, also known as CCR5, is a 45 kD G protein-coupled seven transmembrane CC-chemokine receptor. It binds to MIP-1 $\alpha$ , MIP-1 $\beta$ , and RANTES and is expressed on a subset of T cells and monocytes. CD195 mediates an intracellular signal thought to induce cell differentiation and proliferation. CCR5 has also been shown to act as a co-receptor for R5 HIV-1 cell entry; modification of CCR5 by sulfation contributes to the efficiency of HIV-1 entry. Studies have shown CCR5 to play a role in a variety of other human diseases, ranging from infectious and inflammatory diseases to cancer.
