Product Data Sheet

APC anti-human CD195 (CCR5)

Catalog # / Size: 2395610 / 100 tests

2395605 / 25 tests

Clone: J418F1

Isotype: Rat IgG2b, κ

Immunogen: Human CCR5 transfectants

Reactivity: Human

Preparation: The antibody was purified by affinity

chromatography and conjugated with APC under optimal conditions. The solution is free of unconjugated APC and

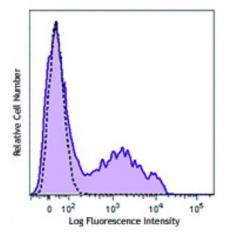

unconjugated antibody.

Formulation: Phosphate-buffered solution, pH 7.2,

containing 0.09% sodium azide and

0.2% (w/v) BSA (origin USA).

Concentration: Lot-specific

Human peripheral blood lymphocytes were stained with CD195 (clone J418F1) APC (filled histogram) or rat IgG2b, κ APC isotype control (open histogram).

Applications:

Applications: Flow Cytometry

Recommended

Usage:

Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is 5 microL per million cells or 5 microL per 100 microL of whole blood. It is recommended that the reagent be titrated for optimal performance for

each application.

Description: CD195, also known as CCR5, is a 45 kD G protein-coupled seven transmembrane

CC-chemokine receptor. It binds to MIP- 1α , MIP- 1β , and RANTES and is expressed on a subset of T cells and monocytes. CCR5 mediates an intracellular signal thought to induce cell differentiation and proliferation. CCR5 has also been shown to act as a co-receptor for R5 HIV-1 cell entry; modification of CCR5 by sulfation contributes to the efficiency of HIV-1 entry. Studies have shown CCR5 to play a role in a variety of other human diseases, ranging from infectious and

inflammatory diseases to cancer.
