## PerCP anti-human CD19

| Catalog \# / Size: | $2415065 / 25$ tests |
| ---: | :--- |
|  | $2415070 / 100$ tests |
| Isotype: | SJ25C1 | Mouse IgG1, к

Human peripheral blood lymphocytes were stained with CD19 (clone SJ25C1) PerCP (filled histogram) or mouse IgG1, к PerCP isotype control (open histogram).

## Applications:

## Applications: Flow Cytometry

Recommended Each lot of this antibody is quality control tested by immunofluorescent staining Usage: with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is 5 microL per million cells or 5 microl per 100 microL of whole blood. It is recommended that the reagent be titrated for optimal performance for each application.

* PerCP has a maximum absorption of 482 nm and a maximum emission of 675 nm.

## Description:

CD19 is a 95 kD type I transmembrane glycoprotein also known as B4. It is a member of the immunoglobulin superfamily expressed on B cells (from pro-B to blastoid B cells, absent on plasma cells) and follicular dendritic cells. CD19 is involved in B cell development, activation, and differentiation. CD19 forms a complex with CD21 (CR2) and CD81 (TAPA-1), and functions as a BCR co-receptor.
