Product Data Sheet

APC/Fire[™] 750 anti-human CD5

Size:	,	
Clone:	L17F12	
lsotype:	Mouse IgG2a, к	O 103 104 105 Log Fluorescence Intensity
Immunogen:	Human T-acute lymphoblastic leukemia (ALL) cells	
Reactivity:	Human	
Preparation:	The antibody was purified by affinity chromatography and conjugated with APC/Fire™ 750 under optimal conditions.	
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v) BSA (origin USA).	Human peripheral blood lymphocytes were stained with
Workshop Number:	II T7	APC/Fire™ 750 CD5 (clone L17F12, filled histogram) or APC/Fire™ 750 mouse IgG2a, κ isotype control (open histogram).
Concentration:	Lot-specific	

Applications:

Applications:	Flow Cytometry
Recommended Usage:	Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is 5 μ l per million cells in 100 μ l staining volume or 5 μ l per 100 μ l of whole blood.
	* APC/Fire™ 750 has a maximum excitation of 650 nm and a maximum emission of 787 nm.
Application Notes:	Additional reported applications (for the relevant formats): immunoprecipitation ^{1,3,4} and immmunohistochemical staining of frozen and formalin-fixed paraffin-embedded sections ^{2,3,5} .

Description:	CD5, also known as Leu-1, Ly-1 and T1, is a 67 kD single chain type I glycoprotein that is a member of the scavenger receptor superfamily. CD5 is expressed on T cells, thymocytes, B cell subsets, chronic B lymphocytic leukemia (B-Cells), and peripheral blood dendritic cells. CD5 modulates T and B cell receptor signaling, thymocyte maturation, and T-B cell interactions. One of its ligands is CD72.
