## PE anti-human CD18

Catalog # / Size: 2431520 / 100 tests

2431515 / 25 tests

Clone: CBR LFA-1/2 Isotype: Mouse IgG1, κ

Immunogen: Purified human LFA-1

Reactivity: Human

**Preparation:** The antibody was purified by affinity

chromatography and conjugated with PE under optimal conditions. The solution is free of unconjugated PE and

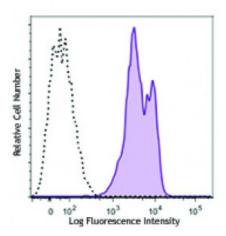

unconjugated antibody.

Formulation: Phosphate-buffered solution, pH 7.2,

containing 0.09% sodium azide and

0.2% (w/v) BSA (origin USA).

**Concentration:** Lot-specific

Human peripheral blood lymphocytes were stained with CD18 (clone CBR LFA-1/2) PE (filled histogram) or mouse IgG1, κ PE isotype control (open histogram).

## **Applications:**

**Applications:** Flow Cytometry

**Recommended** Each lot of this antibody is quality control tested by immunofluorescent staining

Notes:

**Usage:** with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is 5 microL per million cells or 5 microL per 100 microL of whole blood. It is recommended that the reagent be titrated for optimal performance for

each application.

**Application** Additional reported applications (for the relevant formats of this clone) include:

activation of LFA-1 and MAC-1<sup>1,2</sup>. The LEAF<sup>™</sup> or Ultra-LEAF<sup>™</sup> purified antibody (Endotoxin < EU/microg, Azide-Free, 0.2 µm filtered) is recommended for function

assays (contact our custom solutions team).

**Application** 1. Petruzzelli L, et al. 1995. J. Immunol. 155:854. (Activ)

**Description:** CD18, also known as integrin  $\beta$ 2 subunit, LFA-1  $\beta$  subunit, and  $\beta$ 2 integrin, is a 90

- 95 kD type I glycoprotein. CD18 non-covalently associates with CD11a, CD11b, or CD11c. CD18 is expressed on all leukocytes. CD18 and associated α chains

function in the adhesion and signaling in hematopoietic cells.
