

PE/Cy7 anti-human Granzyme K

Catalog # / Size: 2452575 / 25 tests
2452580 / 100 tests

Clone: GM26E7

Isotype: Mouse IgG1, κ

Reactivity: Human

Concentration: Lot-specific

Applications:

Applications: Flow Cytometry

Recommended Usage: Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is 5 μ L per million cells or 5 μ L per 100 μ L of whole blood. It is recommended that the reagent be titrated for optimal performance for each application.

Description: Granzyme K is a 29 kD serine protease found in cytoplasmic granules of cytotoxic lymphocytes and NK cells. Granzyme K is thought to induce cell death and lysis in response to non-self antigens on the cell surface by cleaving nucleosome assembly protein SET. Granzyme K is upregulated in several diseases associated with inflammation including arthritis, atherosclerosis, and asthma.
