Product Data Sheet

PE/Dazzle™ 594 anti-human CD38

Catalog # / 2586095 / 25 tests

Size: 2586100 / 100 tests

Clone: S17015F

Isotype: Mouse IgG2a, κ

Human CD38 transfectants Immunogen:

Reactivity: Human

Preparation: The antibody was purified by affinity

chromatography and conjugated with

PE/Dazzle™ 594 under optimal

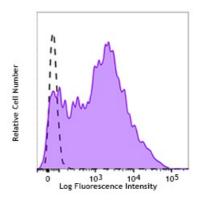

conditions.

Formulation: Phosphate-buffered solution, pH 7.2.

containing 0.09% sodium azide and

0.2% (w/v) BSA (origin USA)

Concentration: Lot-specific

Human peripheral blood lymphocytes were stained with anti-human CD38 PE/Dazzle™ 594 (clone S17015F) (filled histogram) or mouse IgG2a, k PE/Dazzle[™] 594 isotype control (open histogram).

Applications:

Applications: Flow Cytometry

Recommended

Usage:

Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is 5 μL per million cells in 100 μL staining volume or 5 μL per 100 μL of whole blood. It is recommended that the reagent be titrated for optimal performance for each application.

* PE/Dazzle™ 594 has a maximum excitation of 566 nm and a maximum

emission of 610 nm.

Application Notes: S17015F is able to cross-block binding of clones HIT2 and HB-7 also raised against human CD38, but not S17015A based on in-house testing.

Description:

CD38 is a 45 kD type II transmembrane glycoprotein also known as T10. It is an ADP-ribosyl hydrolase expressed at variable levels on hematopoietic cells and in some non-hematopoietic tissues (such as brain, muscles, and kidney). In humans, it is expressed at high levels on plasma cells and activated T and B cells. By functioning as both a cyclase and a hydrolase, CD38 mediates lymphocyte activation, adhesion, and the metabolism of

cADPR and NAADP. CD31 is the ligand of CD38.
