## Purified anti-human EOS

Catalog \# / $2596510 / 100 \mu \mathrm{~g}$
Size:

Clone: W16032A

Isotype: Rat IgG2a, к

Immunogen: Human EOS recombinant protein
(271-520a.a)

Reactivity: Human

Preparation: The antibody was purified by affinity
chromatography.

Formulation: Phosphate-buffered solution, pH 7.2,
containing 0.09\% sodium azide

Concentration: $\quad 0.5 \mathrm{mg} / \mathrm{mL}$

Human peripheral blood lymphocytes were surface stained with CD3 FITC and CD4 APC/Fire ${ }^{\text {TM }} 750$ and then treated with the True-Nuclear ${ }^{\text {TM }}$ Transcription Factor Buffer Set. Cells were then stained with purified EOS (clone W16032A) (left) or rat IgG2a, к isotype (right), and FOXP3 Alexa Fluor® ${ }^{\circledR}$ 647 followed by anti-rat IgG PE. Cells shown are gated on CD3+CD4+ cells.

## Applications:

Applications: Intracellular Flow Cytometry
Recommended Each lot of this antibody is quality control tested by intracellular flow Usage: cytometry using True-Nuclear ${ }^{T M}$ Transcription Factor Staining Protocol. For flow cytometric staining, the suggested use of this reagent is $\leq 0.125 \mu \mathrm{~g}$ per million cells in $100 \mu \mathrm{~L}$ volume. It is recommended that the reagent be titrated for optimal performance for each application.

| Description: | EOS also known as IKZF4 is an IKAROS Family Member expres <br> lymphocytes, specifically in Tregs. It plays an important role in <br> inhibitory function of Tregs. It may be involved in the develop <br> central and peripheral nervous systems as well as Iymphoid deven <br> Antigen |
