

PE Mouse IgG2b, κ Isotype Ctrl

Catalog # / Size: 2611015 / 25 μ g
2611020 / 100 μ g

Clone: 27-35

Isotype: Mouse IgG2b, κ

Reactivity: Mouse

Concentration: 0.2

Applications:

Applications: Flow Cytometry

Recommended Usage: Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is ≤ 0.5 microg per million cells in 100 microL volume. It is recommended that the reagent be titrated for optimal performance for each application.

Description: Clone 27-35 is a mouse IgG2b, κ isotype control which was generated in mice using Dansyl-Keyhole Limpet Hemocyanin (DNS-KLH) immunogen. It does not have any tissue-associated epitope and has been screened against human and mouse tissue to assure its unspecificity and low background.
