

FITC Mouse IgG2b, κ Isotype Ctrl

Catalog # / Size: 2611035 / 25 µg
2611040 / 100 µg

Clone: 27-35

Isotype: Mouse IgG2b, κ

Immunogen: Dansyl-Keyhole Limpet Hemocyanin.

Preparation: The antibody was purified by affinity chromatography and conjugated with FITC under optimal conditions. The solution is free of unconjugated FITC and unconjugated antibody.

Formulation: Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide.

Concentration: 0.5 mg/ml

Applications:

Applications: Flow Cytometry

Recommended Usage: Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis as negative control. Use at concentrations comparable to those of the specific antibody of interest.

Description: Clone 27-35 is a mouse IgG2b, κ isotype control which was generated in mice using Dansyl-Keyhole Limpet Hemocyanin (DNS-KLH) immunogen. It does not have any tissue-associated epitope and has been screened against human and mouse tissue to assure its unspecificity and low background.
