

FITC Mouse IgG2b, κ Isotype Ctrl

Catalog # / Size:	2611040 / 100 μ g 2611035 / 25 μ g
Clone:	27-35
Isotype:	Mouse IgG2b, κ
Immunogen:	Dansyl-Keyhole Limpet Hemocyanin.
Preparation:	The antibody was purified by affinity chromatography and conjugated with FITC under optimal conditions. The solution is free of unconjugated FITC and unconjugated antibody.
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide.
Concentration:	0.5 mg/ml

Applications:

Applications:	Flow Cytometry
Recommended Usage:	Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis as negative control.

Description: Clone 27-35 is a mouse IgG2b, κ isotype control which was generated in mice using Dansyl-Keyhole Limpet Hemocyanin (DNS-KLH) immunogen. It does not have any tissue-associated epitope and has been screened against human and mouse tissue to assure its unspecificity and low background.
