Product Data Sheet

DyLight™ 649 Goat anti-hamster (Armenian) IgG

Catalog # / Size: 2627525 / 100 μg

> Clone: Polv4055 Isotype: Goat IgG

Reactivity: Other

Preparation: The antibody was purified by affinity

> chromatography, and conjugated with DyLight[™] 649 under optimal conditions.

Formulation: Phosphate-buffered solution, pH 7.2,

containing 0.09% sodium azide and

0.2% (w/v) BSA (origin USA).

Concentration: 0.5

Applications:

Applications: Immunofluorescence

Recommended

Usage:

Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is ≤ 0.25 microg per 10^6 cells in 100 microL volume. It is recommended that the reagent be titrated for optimal performance for each application.

* DyLight™ 649 has a maximum absorption of 655nm and a maximum emission of 670nm (similar to Alexa Fluor® 647 and APC).

Application

Notes:

This conjugated goat anti-hamster IgG antibody is useful for immunofluorescent

staining with flow cytometric analysis or microscopy.

Application References: 1. Porcherie A, et al. 2011. J. Exp Med. 11:2225. PubMed 2. Kim Yu, et al. 2015. PLoS One. 10:120294. PubMed

Description:

This polyclonal antibody reacts with the heavy chains of IgG and the light chains common to most immunoglobulins from Armenian hamster. No cross-reactivity has been detected against non-immunoglobulin serum proteins. This antibody has been solid-phase absorbed to ensure minimal cross-reaction with mouse, rat, human, bovine, and rabbit immunoglobulins, but may cross-react with Armenian hamster IgM and Syrian hamster immunoglobulins.
