

Purified anti-mouse IgM

Catalog # / Size: 2632510 / 500 µg
2632505 / 50 µg

Clone: RMM-1

Isotype: Rat IgG2a, κ

Immunogen: Mouse Ig cocktail

Reactivity: Mouse

Preparation: The antibody was purified by affinity chromatography.

Formulation: Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide.

Concentration: 0.5

C57BL/6 Mouse splenocytes stained with purified RMM-1, followed by anti-rat IgG FITC

Applications:

Applications: Other

Recommended Usage: Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is ≤ 1.0 microg per million cells in 100 microL volume. It is recommended that the reagent be titrated for optimal performance for each application.

Application Notes: The RMM-1 antibody reacts with both soluble and membrane immunoglobulin M in all tested mouse haplotypes (Igh-a and b). It does not react with other isotypes. Some formats of the RMM-1 antibody may be used as primary or secondary reagent for immunofluorescent staining or ELISA analysis.
