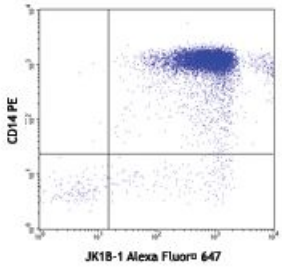
Product Data Sheet

Alexa Fluor® 647 anti-human IL-1β

Catalog # / Size:	3141040 / 100 tests 3141035 / 25 tests
Clone:	JK1B-1
Isotype:	Mouse IgG1, κ
Immunogen:	Recombinant human IL-1 beta
Reactivity:	Human
Preparation:	The antibody was purified by affinity chromatography and conjugated with Alexa Fluor® 647 under optimal conditions.
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and BSA (origin USA).
Workshop Number:	HCDM listed
Concentration:	Lot-specific



LPS-stimulated (6 hour) human peripheral blood monocytes surface stained with CD14 PE, then intracellualar stained with JK1B-1 Alexa Fluor® 647

Applications:

Applications:	Intracellular Staining for Flow Cytometry
Recommended Usage:	Each lot of this antibody is quality control tested by intracellular immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is 5 µl per 10^6 cells in 100 µl volume. It is recommended that the reagent be titrated for optimal performance for each application. * Alexa Fluor® 647 has a maximum emission of 668 nm when it is excited at 633nm / 635nm.
Application Notes:	**Other and ELISPOT Capture:** The purified JK1B-1 antibody is useful as the capture antibody in a sandwich Other assay, when used in conjunction with the biotinylated JK1B-2 antibody as the detecting antibody. **Flow Cytometry:** The fluorochrome-labeled JK1B-1 antibody is useful for intracellular immunofluorescent staining and flow cytometric analysis to identify IL-1β-producing cells within mixed cell populations.

Description: IL-1 refers to two proteins, IL-1α and IL-1β which are the products of distinct genes, but which are recognized by the same cell surface receptors. IL-1β is a potent immuno-modulator which mediates a wide range of immune and inflammatory responses including the activation of B and T cells. The JK1B-1 antibody reacts with human interleukin-1β (IL-1β) and baboon IL-1β. The JK1B-1 antibody does not recognize mouse IL-1β or human IL-1α or other cytokines. The JK1B-1 antibody can neutralize the bioactivity of natural or recombinant IL-1β.
